Subject: Wilcox Community Meeting
Date: Friday, July 22, 2016 7:39:00 AM

Mike,

Great Meeting, Wilcox Oil Superfund Site, Bristow Oklahoma. Had 26 people attend. We did have Press coverage. They interviewed people and talked with Katrina. FOX 23 Tulsa. We had an open house format to start and finish the meeting. We had posters and handouts and Katrina and ODEQ Project Manager Todd Downham talked with residents before and after the presentation.

Katrina did an **outstanding job** explaining what is going on at the site and what to expect in the next round of sampling. The next sampling will start in September and we plan to revisit the community when those results are compiled.

There was very good interaction between the residents and both Agencies. Questions were answered or referrals made to the proper people or agency.

We met with the Bristow Mayor, before the meeting, and he stayed for part of the meeting. He had to leave for a Council Meeting but seemed very pleased with the progress and the fact we are keeping everyone informed and up to date on the Site.

Meeting 6 to 7, people arrived 5:30 and we stayed till 7:45, then returned to Tulsa to call it a Day.
